

DRUG DISTRIBUTION SYSTEMS

Dispensing and Cart Systems

SHELLY'S MEDICATION SERVICES can provide modern medication carts for the any dispensing program. These carts are convertible to a traditional 30 day unit dose, blister card, seven day exchange, or other compliance protocol if deemed appropriate by your facility.

We have active accounts utilizing most types of systems and dispensing methodologies including **Artromick's®** state of the art select series cassette system and will supply the system preferred by your facility. Our support staff would be pleased to discuss the relative merits of various systems and methodologies at your request.

State-of-the-art medication carts along with the drug distribution system you select will reduce the incidence of medication errors, minimize staff time for medication pass, ensure proper documentation, and reduce waste. All of this is configured by your specifications and needs.
